Prior to the 1998 master plan, the physical form of campus had supported a campus culture of parking adjacent to buildings, with a minimum walk from parking space to front door.

**Guiding principles for the plan**

1. Create the optimal student environment.
2. Extend the characteristics of North Campus.
3. Develop a connected campus.
4. Define and provide for current and future facility needs.
5. Provide for academic and student needs on contiguous land.
6. Develop comprehensive solutions to traffic, parking and infrastructure.
7. Protect and enhance natural resources.
8. Participate in regional coordination.

“We can try to create a physical atmosphere that is conducive to learning and contemplation, we should focus on a process which gives open space equal footing with building construction.”

- Dexter Adams
